**RESPONSE TO OFFICE ACTION**

This paper is submitted in response to the Office Action dated August 21, 2003 (Paper No. 9). A request for an appropriate extension of time is being filed concurrently herewith.

**IN THE CLAIMS**

20. (Amended) A method for evaluating the ability of a chemical entity to associate with an I-domain of the  $\alpha 1$  chain of the  $\alpha 1\beta 1$  integrin or a complex comprising  $\alpha 1\beta 1$  integrin or homologs thereof, said method comprising the steps of:

- (a) employing computational or experimental means to perform a fitting operation between the chemical entity and said  $\alpha 1\beta 1$  integrin or I-domain or complex thereof, thereby obtaining data related to said association; and
- (b) analyzing the data obtained in step a) to determine the characteristics of the association between the chemical entity and said at least a portion of  $\alpha 1\beta 1$  integrin or I-domain or complex.
